About

Anabib Al Sharq Establishment is a Saudi-based industrial services company located in Al Jubail, strategically positioned to serve construction, infrastructure, oil & gas, and industrial projects across the Eastern Province.

We specialize in providing end-to-end site support solutions by combining contracting expertise, skilled manpower, reliable equipment, and quality materials. Our operational strength lies in understanding project requirements and delivering practical, cost effective, and timely solutions while maintaining strict safety and quality standards.

Vision

To be a trusted and preferred industrial services partner in Saudi Arabia, known for service reliability, safety excellence, and operational efficiency.

Mission

To support client projects by delivering dependable contracting, manpower, equipment, and industrial services that meet technical requirements and project timelines.

Our Commitment

Compliance with Saudi regulations and safety standards

Continuous improvement in service quality

Long-term client partnership

Ethical and transparent business practices

General Contracting & Fabrication Work

General Contracting

We offer end - to - end general contracting services tailored to industrial, infrastructure, and commercial projects. Our team manages projects from initial planning through execution and completion, ensuring coordination between manpower, materials, equipment , and site activities. We focus on delivering works that comply with project specifications, safety regulations, and quality standards.

Our contracting approach emphasizes efficient site management, resource optimization, and timely delivery while maintaining flexibility to adapt to changing project requirements.

Types of General Contracting Works Include

- Civil construction and site development works
- Industrial building and facility works
- Maintenance and shutdown support works
- Structural modification and repair works
- Subcontractor coordination and supervision
- Project execution support and site management

Fabrication Services Include

- Structural steel fabrication for industrial projects
- Pipe supports, frames, and brackets
- Platforms, walkways, staircases, ladders, and handrails
- Equipment skids and base frames
- Custom metal fabrication as per site needs

Fabrication Work

Our fabrication division provides reliable metal fabrication solutions to support construction and industrial operations. We handle fabrication works based on approved drawings, technical specifications, and site measurements, ensuring durability, accuracy, and safety.

Fabrication is carried out using quality materials and skilled workmanship to meet project specific requirements.

Heavy Equipment Rental & Transportation

Heavy Equipment Rental

We provide a comprehensive range of heavy equipment on rental basis to support construction, industrial, and infrastructure projects. Our rental solutions help clients minimize capital investment while ensuring access to reliable, well-maintained machinery.

All equipment undergoes routine inspection and preventive maintenance to ensure safe and efficient operation on site.

Equipment Types Include

- Excavators (various capacities)
- Backhoe loaders and wheel loaders
- Forklifts and material handling equipment
- Mobile cranes and lifting equipment
- Compactors, rollers, and earthmoving machinery
- Light construction equipment and tools

Transportation Services Include

- Construction material transportation
- Heavy equipment shifting and relocation
- Scrap and waste transportation
- Manpower and staff transportation
- Project-based logistics coordination

Transportation Services

Our transportation services support smooth project logistics by ensuring timely and safe movement of materials, equipment, and manpower. We understand the importance of reliable logistics in maintaining project schedules.

Manpower Supply & Material Supply

Manpower Supply

We supply qualified and reliable manpower to meet the workforce requirements of construction, industrial, and maintenance projects. Our manpower solutions are flexible and scalable, allowing clients to adjust workforce strength based on project phases

All personnel are selected based on skill level, experience, and site readiness to ensure productivity and compliance with site rules.

Manpower Categories Include

- Project engineers and site supervisors
- Equipment operators and drivers
- Welders, fabricators, and fitters
- Scaffolders and riggers
- Electricians and technicians
- General labor, helpers, and support staff

Material Supply

We supply qualified and reliable manpower to meet the workforce requirements of construction, industrial, and maintenance projects. Our manpower solutions are flexible and scalable, allowing clients to adjust workforce strength based on project phases

Materials Supplied Include

- Construction and civil materials
- Structural steel and metal material
- Industrial consumables and accessories
- Safety materials, PPE, and tools
- Electricians and technicians
- Project-specific materials as per client requirements

Scaffolding Erection & Dismantling

Scaffolding Erection Services

We provide complete scaffolding solutions designed to support construction, maintenance, and industrial activities. Our scaffolding services are executed by trained and experienced teams following approved safety procedures and industry standards.

From planning to dismantling, we ensure scaffolding structures are stable, secure, and suitable for the intended work scope.

Scaffolding Services Include

- Scaffolding design and work method planning
- Supply of scaffolding materials and accessories
- Erection and dismantling of scaffolding systems
- Periodic inspection and safety tagging
- Support for shutdowns, maintenance, and long-term projects

Scrap Dealer Services

We offer professional scrap handling and trading services for industrial, construction, and maintenance sites. Our services help clients maintain clean worksites while ensuring responsible disposal and recycling practices.

Scrap Services Include

- Collection of ferrous and non-ferrous scrap
- Industrial and construction scrap handling
- Site clearance and removal services
- Segregation, loading, and transportation
- Compliance with local disposal and recycling regulations
